DONOR INFORMED CONSENT FORM AND AUTHORIZATION FOR COMMERCIAL USE OF BIOLOGICAL MATERIALS

Muse Bio Commercial Donation Program
"Collection of Menstrual Blood for Commercial Product Manufacturing"

Principal Investigator: Aya Fattah

Contact: aya@mycells.bio

Collection Sites:

- 995 Market St, San Francisco, CA 94103
- 319 N Bernardo Ave, Mountain View, CA 94043

Program ID: MB-COMM-001

IMPORTANT NOTICE: This is a COMMERCIAL donation program, NOT a research study. The biological materials you donate will be used to manufacture commercial cosmetic products that will be sold for profit. Please read this document carefully and ask questions before signing.

CONFLICT OF INTEREST DISCLOSURE

The staff managing this donation program have an ownership interest in Muse Bio, the company that will manufacture and sell products derived from your donation. Muse Bio will benefit financially from the commercial sale of products created using your donated biological materials.

NATURE AND PURPOSE OF THIS DONATION PROGRAM

Muse Bio is collecting menstrual blood samples from healthy donors to isolate menstrual blood-derived stromal/stem cells (MenSCs) and create a cell-free conditioned media. This is a COMMERCIAL program.

What We Do With Your Donation:

- Isolate menstrual blood stromal/stem cells (MenSCs) from your sample
- Expand and culture these cells in specialized media
- Collect the media containing all secretions from the cells (proteins, growth factors, and other substances)
- Filter out or eliminate ALL cells from the media
- Sell the cell-free conditioned media to cosmetic manufacturers as an ingredient

The final products are cosmetic products intended solely for appearance enhancement, NOT for medical, therapeutic, or drug purposes. No health claims are made or implied.

You will not receive any medical diagnosis, treatment, or health benefits from participating.

WHAT YOU WILL BE ASKED TO DO

If you choose to participate as a donor, you will complete the following steps:

STEP 1: HEALTH SCREENING

You will complete a **Medical Questionnaire** (~15-30 minutes) to determine if you are conditionally eligible to donate.

Muse Bio will then conduct a **Medical History Screening Interview** (~15-30 minutes) with you going over all screening form questions and clarifying certain responses if needed.

If any disqualifying risk factors are identified through this process, we will inform you before proceeding to blood and urine testing. This saves you time and ensures we only test candidates who are likely eligible.

STEP 2: INFECTIOUS DISEASE SCREENING (Blood Draw & Urine Sample)

If your health screening indicates you are conditionally eligible, you will undergo infectious disease testing at a CLIA-Certified Lab. This is required to ensure the safety of the final commercial product.

Testing Procedure: A trained phlebotomist will draw blood from your arm. You may experience minor discomfort, bruising, or rarely, fainting from the blood draw. You will also provide a urine sample or vaginal swab, depending on your preference, for STI/STD testing.

Your blood and urine will be tested for the following infectious diseases:

- HIV-1 and HIV-2 (Human Immunodeficiency Virus)
- Hepatitis B Virus (HBV)
- Hepatitis C Virus (HCV)

- Syphilis (Treponema pallidum)
- Human T-Lymphotropic Virus (HTLV-I/II)
- Cytomegalovirus (CMV)
- West Nile Virus (WNV)
- Chagas Disease (Trypanosoma cruzi)
- Chlamydia trachomatis *(urine or vaginal swab)**
- Neisseria gonorrhoeae (Gonorrhea) *(urine or vaginal swab)**

* Donors may choose between urine sample or self-collected vaginal swab for Chlamydia/Gonorrhea testing

Testing Location & Payment: Testing will be conducted at a patient service center convenient to the donor. Muse Bio will cover the full cost of all testing.

CRITICAL TIMING REQUIREMENT: Blood testing must occur within 14 days (7 days before or 7 days after) of your menstrual blood collection. Please plan your donation accordingly.

Eligibility to Donate: If ALL test results are NEGATIVE, you will be considered eligible to donate. If ANY test result is POSITIVE or INDETERMINATE, you will NOT be eligible to donate.

Notification of Results: You will be notified of your test results by a CLIA-certified lab. If all tests are negative, you will be cleared to donate. If menstrual blood sample is collected prior to testing, it will be processed in a quarantine state until final results. For positive results, please refer to page 10.

STEP 3: CUP PICKUP SCHEDULING

You will then select a date and time to pick up your menstrual cup at the Muse Bio collection site using our secure donor calendar.

- We will provide you with a commercially available menstrual cup to collect your sample
- Review the provided instructions on how to use a menstrual cup

STEP 4: BLOOD COLLECTION SCHEDULING

Schedule your menstrual blood drop-off appointment:

- Plan to collect your sample during the first 1-3 days of your menstrual cycle for optimal cell viability
- Use the Muse Collection Calendar to book your drop-off appointment
- Estimate your flow and plan to wear the provided menstrual cup for approximately 4-8 hours before your drop-off (avoid wearing the cup for more than 12 hours)
- If your cycle timing shifts, you may update your appointment time
- **Remember:** Your blood test and menstrual collection must be within 7 days of each other

STEP 5: SAMPLE COLLECTION AT THE COLLECTION SITE

On the day of your collection appointment:

Arrival and Check-In:

- Arrive at the collection site at the scheduled time
- Check in with the Principal Investigator or designated staff member

Final Medical Evaluation (~2 minutes):

- Confirm you still meet all eligibility criteria, and no changes to your screening form responses have been made
- Physical evaluation of donor
- Confirm that you are in good health (i.e. no acute illness, etc.)
- This is required to ensure continued eligibility at the time of donation

Sample Collection (~10-15 minutes):

- A staff member will review the collection process with you
- In a private bathroom, you will remove the menstrual cup
- Pour the contents into the provided vial
- Return the vial to study staff

Donor Experience Survey (~2-5 minutes):

- You will be asked about your experience using the menstrual cup and the donation process
- This feedback helps us improve our procedures and customer service

Compensation:

- Upon completion of all study requirements, you will receive your compensation (please view page 6 for compensation information)

ELIGIBILITY REQUIREMENTS

TO DONATE, YOU MUST:

- Be currently menstruating
- Live in or be available to visit the San Francisco Bay Area
- Be willing and able to use a menstrual cup
- Pass all required infectious disease screening tests and no risk factors identified
- Provide informed consent

YOU CANNOT DONATE IF YOU (not an exhaustive list):

- Amenorrhea > 6 months
- Are currently pregnant, breastfeeding, or within 6 months postpartum (even if no longer breastfeeding)
- Are currently taking or have recently taken: immunosuppressant medications (transplant drugs, biologics, methotrexate) at any time; systemic corticosteroids (oral/IV prednisone, etc.) within the past 30 days; or antibiotics for an active infection within the past 14 days.
- Have ever been diagnosed with genital or oral herpes HSV-1 or HSV-2, or have had any vaginal/gynecological infections treated within the past 60 days.
- Have applied creams, ointments, or products to the vaginal/genital area within 24 hours of collection.
- Take chronic anticoagulant medications (blood thinners or ongoing conditions)
- Have an IUD (copper or hormonal) or have had one removed within 90 days of collection (3 cycles).
- Are uncomfortable or unwilling to use a menstrual cup.
- Are currently infected with or have been treated within the past 3 months for chlamydia, gonorrhea, syphilis, trichomoniasis, or other STIs.
- Test positive for any infectious disease on the screening panel.
- Flag positive for any risk factors on our screening form
- Have a confirmed diagnosis of endometriosis

RISKS AND DISCOMFORTS

Blood Draw Risks:

- Pain, bruising, or swelling at the needle site
- Rarely: fainting, excessive bleeding, or infection at the puncture site
- Anxiety or discomfort associated with needles

Menstrual Cup Use Risks:

- Mild discomfort during insertion or removal
- Rare risk of vaginal irritation or injury if used incorrectly

- Rare risk of Toxic Shock Syndrome (TSS) if left in place too long. Do not wear the menstrual cup for more than 12 hours.

Privacy Risks:

- Small risk of accidental data disclosure or sample mislabeling
- Risk that your infectious disease test results could be inadvertently disclosed

Emotional Risks:

- Anxiety or distress if you receive a positive test result for an infectious disease
- Discomfort discussing menstrual health or providing menstrual samples

Unknown Risks:

- There may be other risks that are currently unknown

BENEFITS OF DONATION

You will NOT receive any direct personal benefit from donating. The benefits are limited to:

- Financial compensation ($150)
- Muse Bio gift (valued up to $20)
- Contributing to the development of new stem cell derived products

You will NOT receive:

- Any medical diagnosis or treatment
- Any health benefits or therapeutic interventions
- Any share of profits from products sold

ALTERNATIVES TO DONATION

The only alternative to participating in this donation program is to not participate.

OWNERSHIP, INTELLECTUAL PROPERTY, AND COMMERCIAL RIGHTS

THIS IS THE MOST IMPORTANT SECTION. PLEASE READ CAREFULLY.

By signing this consent form, you understand and agree to the following:

1. YOU GIVE UP ALL RIGHTS TO YOUR DONATED MATERIALS AFTER PROCESSING

- Once you donate your menstrual blood and processing begins, you give up all rights, title, and interest in the donated sample
- You cannot withdraw, request return, or control the use of your sample after processing (within the scope described in this consent)

2. MUSE BIO OWNS ALL MATERIALS AND PRODUCTS

- Muse Bio will own the cells isolated from your donation
- Muse Bio will own the conditioned media produced from your cells
- Muse Bio will own all products created using your donated materials
- Muse Bio owns the intellectual property rights, including patents, that may arise from your donation

3. NO ONGOING RIGHTS OR ROYALTIES

- You will NOT receive any share of profits from products sold
- You will NOT receive royalties or ongoing compensation
- You will NOT own any intellectual property that results from your donation
- You will NOT have any proprietary interest in commercial products

4. COMMERCIAL USE IS UNLIMITED

- Muse Bio may sell these products worldwide
- Muse Bio may make unlimited profit from these products
- There is no time limit on commercial use
- Muse Bio may license or transfer commercial rights to other companies

5. NO OWNERSHIP OF YOUR CELLS OR THEIR PRODUCTS

- Even though the cells came from your body, you do NOT own them after donation
- The conditioned media produced from your cells is NOT yours
- Products made from your donation are NOT yours
- This follows legal precedent established in *Moore v. Regents of the University of California (1990)*

6. FUTURE USES MAY EXPAND

- **De-identified data may be stored and analyzed for research and commercial applications**
- If we wish to use your donation for significantly different purposes we will seek additional consent if legally required
- We cannot predict all future commercial applications

YOU WILL RECEIVE ONLY THE ONE-TIME $150 COMPENSATION. YOU WILL NOT RECEIVE ANY ADDITIONAL PAYMENT, REGARDLESS OF HOW PROFITABLE THE PRODUCTS BECOME.

DONATION IS FINAL AND IRREVOCABLE

CRITICAL: Once you donate your sample and it is processed, you CANNOT take it back.

BEFORE Donating Your Sample:

- You may withdraw from the donation program at any time before providing your sample
- No materials will be collected or used

AFTER Donating Your Sample and it is Processed:

- You CANNOT withdraw your sample
- You CANNOT request return of your materials
- You CANNOT stop commercial use of products already created from your donation
- You CANNOT revoke the rights you granted to Muse Bio

You may request that:

- Your identifiable data be deleted (but de-identified data will remain)
- You not be contacted for future donations

Once processing begins (within hours of receiving your sample), it cannot be reversed. This is why your donation must be final.

COMPENSATION FOR DONATION

You will receive:

- $150 gift card per donation (provided immediately after successful sample submission)
- A Muse Bio gift (valued up to $20)

IMPORTANT: You will receive the same compensation regardless of whether your sample produces viable cells or usable conditioned media. Compensation is for your time and effort, not for the quality of your donation.

Compensation is available only to participants who complete all required procedures and at the discretion of the Muse Bio staff.

MULTIPLE DONATION OPPORTUNITIES

You may donate multiple times throughout the calendar year, up to 13 times total.

Payment for donations may be considered taxable income. If you receive more than $2000 in any calendar year, Muse Bio will report this income to the IRS using a 1099-MISC form. You will need to provide your social security number for tax reporting purposes if total annual compensation exceeds $2000.

WHAT HAPPENS TO YOUR SAMPLE

Processing and Use:

- Your menstrual blood will be processed to isolate MenSCs
- Cells will be cultured and expanded in specialized media for multiple passages
- Conditioned media will be collected as cells secrete proteins and growth factors
- All cells will be filtered out—the final product is cell-free

Storage and Retention:

- Your cells may be cryopreserved (frozen) for future use in producing additional conditioned media
- Cell lines may be maintained **indefinitely** for ongoing commercial production
- There is no set time limit for how long your cells or conditioned media will be stored

Disposal:

- If cells are no longer viable or usable, they will be disposed of according to biohazard protocols
- You will NOT be notified if/when your samples are disposed of

SHARING OF SAMPLES WITH THIRD PARTIES

- Muse Bio may share your donated materials with third parties, including
- Contract Manufacturing Organizations (CMOs)
- CLIA-Certified Testing Laboratories
- Business Partners
- Research Institutions

When Samples Are Shared:

- All samples will be de-identified
- Your name and contact information will NOT be shared
- Third parties will sign confidentiality and material transfer agreements
- Third parties must comply with ethical standards and regulations

CONFIDENTIALITY, PRIVACY, AND AUTHORIZATION FOR USE OF MEDICAL INFORMATION

(California Confidentiality of Medical Information Act)

Muse Bio is committed to protecting your medical information in compliance with the California Confidentiality of Medical Information Act (CMIA).

MEDICAL INFORMATION WE WILL COLLECT:

We will collect the following medical information from you includes:

- Health screening questionnaire responses
- Menstrual cycle and reproductive health history
- Results of infectious disease testing and internal screening documents

- Eligibility Determination
- Information about medications, health conditions, and behaviors relevant to donation eligibility
- Contact information and demographic data (which will be stored separately from your sample)

HOW WE WILL USE YOUR MEDICAL INFORMATION:

Your medical information will be used to:

- Determine whether you are eligible to donate biological materials
- Ensure the safety of products manufactured from donated materials
- Conduct quality control and safety monitoring
- Maintain required records
- Contact you for future donation opportunities

WHO WILL RECEIVE YOUR MEDICAL INFORMATION:

Your medical information will be disclosed to:

- CLIA-Certified labs - for infectious disease testing Public health authorities - as required by California law for reportable diseases
- Contract laboratories or manufacturers (only de-identified data)
- Federal or state regulators - if requested during inspections or investigations

We will disclose only the minimum necessary information to accomplish the purpose of the disclosure.

DATA WE WILL COLLECT AND RETAIN:

For each donor, we will collect and retain the following data:

- Donor eligibility determination decision
- Donor screening questionnaire responses, interview and in-person assessment documents
- Laboratory test results and reports
- Summary of records used and results of donor eligibility determination
- Signed informed consent documents
- Contact information for future donation communications
- Laboratory-specific data including sample volume, viability, and cell characteristics
- Feedback survey data

All records will be retained for at least 10 years as required by federal safety regulations (or as long as products are being sold).

EXPIRATION:

This authorization expires upon written revocation.

RIGHT TO REVOKE:

You may revoke this authorization at any time by writing to:

Aya Fattah, Principal Investigator
Muse Bio
aya@mycells.bio

Revocation will not affect:

- Information already disclosed before revocation
- Actions already taken based on this authorization
- Our legal obligations to retain records
- Samples already collected and processed

RE-DISCLOSURE:

Once your medical information is shared with outside parties (such as the testing laboratory or public health authorities), it may no longer be protected by California privacy laws.

Muse Bio cannot control how these parties handle your information, though we require them to follow strict confidentiality rules. For example:

- If we share your test results with the CLIA laboratory, they follow their own privacy policies
- If we report a positive HIV test to public health authorities as required by law, they may share that information with other public health agencies for disease control purposes
- If a third party experiences a data breach, we cannot prevent unauthorized access to your information

While we take every precaution to protect your privacy, we cannot guarantee absolute confidentiality once information leaves our control.

RIGHT TO REFUSE:

You may refuse to sign this authorization. If you refuse, you will not be able to participate in this commercial donation program. Your refusal will not affect your access to healthcare or any other services.

RIGHT TO COPY:

You have the right to receive a copy of this signed authorization.

ACKNOWLEDGMENT:

I understand that:

- I have read and understand this authorization for use of my medical information
- I may revoke this authorization at any time in writing
- I will receive a copy of this signed authorization
- Refusal to sign will make me ineligible to donate
- My medical information may be re-disclosed and lose privacy protections once shared with outside parties
- I am not required to sign this authorization to receive healthcare

YOUR RIGHTS AS A DONOR

As a participant in this commercial donation program, you have the right to:

- Receive a copy of this signed consent form
- Ask questions before, during, and after the donation process
- Withdraw from future donations at any time (but not after a sample is processed)
- Request deletion of your identifiable information (subject to legal and regulatory requirements)

You do NOT have the right to:

- Withdraw your donated sample after processing
- Control how your donated materials are used commercially
- Receive royalties or profit-sharing from products
- Prevent Muse Bio from commercializing products derived from your donation

By signing this consent form, you do NOT waive any legal rights or release Muse Bio from liability for negligence or misconduct.

IF YOU TEST POSITIVE OR INDETERMINATE FOR AN INFECTIOUS DISEASE

As part of standard donor eligibility screening, your blood sample will be tested for infectious diseases in

accordance with applicable federal, state, and local regulations.

If all tests return **negative**, you will be cleared to participate in donation activities.

If any test result is **positive or indeterminate** for an infectious disease:

- The testing laboratory may contact you directly as required by law.
- In accordance with public health requirements, certain results may be reported to state or local health departments as required by California law including your name and contact information
- Muse Bio does not provide clinical diagnosis or medical treatment; however, we will contact you within 48 hours of your positive/indeterminate test result and supply you with a list of local healthcare providers and clinics that can offer confirmatory testing, counseling, and follow-up care.

All test results and related communications will be handled with **strict confidentiality** and in accordance with **applicable privacy laws**. Our commitment is to ensure that all donors are treated with professionalism, respect, and compassion.

Donation Eligibility:

- You will NOT be eligible to donate menstrual blood for Muse Bio's Commercial Donor Program

Confidentiality:

- Test results will remain confidential to the extent permitted by law
- Public health reporting is legally required and cannot be avoided

WITHDRAWAL FROM THE DONATION PROGRAM

You may stop participating in this donation program prior to sample processing without penalty. Your decision will not affect your access to healthcare or any services. However, you must understand:

BEFORE Sample Processing:

- You may withdraw at any time before providing your sample
- No materials will be collected or used

AFTER Sample Processing:

- You CANNOT withdraw your sample
- You CANNOT request return of your donated materials
- You CANNOT stop commercial use of products already created from your donation
- You CANNOT revoke the rights you granted to Muse Bio

ESTIMATED TIME COMMITMENT

Per Donation:

- Medical Questionnaire: 15-30 minutes
- Medical History Interview: 15-30 minutes
- Blood draw (first time or as required): 15-30 minutes
- Waiting for test results: 1-3 business days
- Menstrual cup pickup: 10 minutes
- Final Medical Evaluation: 2 minutes
- Sample collection and drop-off: 10-15 minutes hands-on
- Donor experience survey: 2-5 minutes
- Total time per donation cycle: Approximately 1-2 hours across multiple days

QUESTIONS AND CONTACTS

For Questions About This Donation Program:

Contact: Aya Fattah, Principal Investigator
Email: aya@mycells.bio
Phone: (925)786-6752
Address: 995 Market St, San Francisco, CA 94103

NEW FINDINGS

If any new important information is discovered that may influence your willingness to continue as a donor, Muse Bio will provide that information to you promptly.

COSTS

There will be no charge to you for:

- Infectious disease screening blood tests
- Menstrual cup (if needed)

You are responsible for:

- Transportation to and from donation sites
- Any personal menstrual products you choose to use instead of provided cup

CONSENT STATEMENT

By signing below, I confirm that:

- I have read this entire consent form (or it has been read to me), had the opportunity to ask questions, and will receive a signed copy.
- I voluntarily agree to participate in this commercial donation program and understand I may withdraw from future donations at any time.
- My donated materials will be used to create commercial cosmetic products (not medical or therapeutic products), and I will not receive royalties, profit-sharing, or compensation beyond the one-time $150 payment.
- Once my sample is processed, I cannot withdraw or take it back; previously processed materials and data also cannot be retrieved or destroyed once incorporated into manufacturing workflows.
- Muse Bio will own all donated cells, conditioned media, and products derived from my materials, and I am giving up all rights to my donation.
- My samples will be used only for stem cell isolation and collection of secreted factors for cosmetic purposes, not for therapeutic use.
- My blood and urine will be tested for relevant infectious diseases per FDA regulations and company policy; I will be notified of any positive or abnormal results, and results may be reported to public health authorities if required by law.
- Muse Bio does not provide medical diagnosis, counseling, or treatment, and I am responsible for following up with my own healthcare provider if needed.
- I authorize Muse Bio to use and disclose my health information as described in this form; my personal information will be kept confidential in accordance with HIPAA, CMIA, and applicable privacy regulations.
- My samples and data may be retained for at least 10 years as required by federal regulations.
- I understand that providing false, incomplete, or misleading information may result in ineligibility and could pose risks to others through products derived from my donation.
- I may be excluded from donation at any time if I do not meet eligibility criteria or if new medical or risk information arises.
